Parliamentain. Miss Izoro DeWolf;

# Cut Your Kitchen Hours in Half

A woman should have three hours open air exercise daily. Often it takes so much time to pre-pare and clear up after meals that you have little chance for three hours outdoors in between.

Apply a little science to your kitchen work. Your husband would if he were doing it. What you need is the two greatest kitchen conveniences known to modern housekeepers—

The "HOOSIER" Cabinet and "DIRECT ACTION" Gas Ran

# The "DIRECT ACTION" Gas Range Is The Greatest Gas Saver

Because it has separate burners for the oven and broiler. It has no deflecting plates to retard the "QUICK ACTION" of the heat; no oven walls to sweat and rust out.

THE SIMPLE CONSTRUCTION of the "Direct Action" oven does away with the old style plates that deflect the heatin the wrong direction (as used on all others). The heat of a DIRECT ACTION acts directly in the oven. There is no waiting for the oven to become hot enough to put the baking in. When you light the business the over its part of the oven to be a constant of the over the ove you light the burners the oven is ready to put the baking in. See the saving? Others have.

# The "HOOSIER" Kitchen Cabinet

Is The Standard Home Cabinet

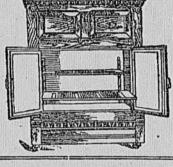

The woman who uses one knows. There are over 400,000 such women. They have found that most of the drudgery of kitchen work is unnecessary.

When you learn the short cuts the HOOSIER CABINET affords you, too, will join these 400,000 other women. Let us explain the HOOSIER CABINET SYSTEM to YOU.

Mr. and Mrs. Jack Camp this week, concluding a visit with Suffolk relatives, left for their home in Ocala, Fia.

# - By EllaWheeler Wilcox

Through rough rivers and veins on the nameless quest. The tide of my life goes hurriedly sweeping, Till it reaches that curious wheel o' the breast, The human heart, which is never at rest, Faster, faster, it cries, and leaping,

Plunging, dashing, speeding away, The wheel and the river work night and day. I know not wherefore, I know not whither

This strange tide rushes with such mad force; It glides on hither, it slides on thither, over and over the self-same course, With never an outlet and never a source; And it lashes itself to the heart of passion

And whirls the heart in mill-wheel fashion.

I can hear in the hush of the still, still night, The ceaseless sound of that mighty river; I can hear it gushing, gurgling, rushing
With a wild, delirious, strange delight,
And a conscious pride in its sense of might, As it hurries and worries my heart forever.

For little by little the heart is wearing,

And I wonder oft as I lie awake, And list to the river that seethes and surges Over the wheel that it chides and urges-I wonder oft if that wheel will break

Like the wheel of the mill, as the tide goes tearing And plunging hurriedly through my breast, In a network of veins on a nameless qust, From and forth, unto unknown oceans, With the mighty pressure it bears, some day, Bringing its cargoes of fierce emotions, With never a pause or an hour for rest. Or slowly and wearily wear away.
